

## **Troy Garden Club invites you to our** **Perennial Plant Exchange – May 16, 2026**

Spring is really here because it is time for gardeners who have found an overabundance of some plants to dig them up and bring them to the Perennial Plant Exchange to trade for some new colors, new shapes, or new plants. From past experience I know some gardeners just bring their extras to share with others. Some gardens have lost a tree and have morphed from shade garden to full sun and need some new stars in their plantings.

Everyone loves the free compost and will bring their own containers.

This year we are back in the Troy Family Aquatic Center (TFAC) parking lot next to the tennis bubble in the Civic Center complex. While we officially start at 10 AM, some arrive early for prime locations.

This event is free to the public to help the world become a more beautiful place. Remember, **we operate OUTDOORS rain or shine so dress accordingly. Plants must be disease free and pest free. Please label your plants as to type and color of bloom if known. You may wish to bring a wagon or a friend to facilitate trading. Saturday May 16, 10 am to 12:00 noon. Trading only.**
